SPS Award for Outstanding Undergraduate Research

Deadline: March 15

Award Details

- Two or more awards may be made each year to individuals who meet the criteria.
- Winners receive a free trip to attend and present their research at the International Conference of Physics Students (ICPS), usually held in Europe; are encouraged to give a presentation in an SPS research session at a national physics meeting; and receive a $500 honorarium for themselves and a $500 honorarium for their SPS chapter.

Requirements

- Awarded to undergraduates on the basis of their research, letters of recommendation, and SPS participation
- Applicants must be members of the SPS national organization

About ICPS

The International Conference of Physics Students (ICPS) 2015 will take place August 12-19 in Zagreb, Croatia. Up to 450 students from all over the world will enjoy lectures given by top-class researchers, trips to scientific institutions and excursions. They will also present their own research in talks or poster-sessions in front of an international audience. The ICPS is planned by the International Association of Physics Students (IAPS), a non-governmental association run by students for students and recent graduates who are interested in physics. SPS is a National Committee member of IAPS representing the United States. Typically, ICPS attendees are upper level undergraduate, and first and second year graduate students. Previous conferences have been held in Scotland, Romania, England, Denmark, Turkey, Austria, Russia, Poland and Croatia. The conference language will be English. Website: http://icps2015.com/
