

Connecting WORLDS through science & service

2012

Sigma Pi Sigma Quadrenial Congress

November 8 - 12, 2012

Kennedy Space Center, Orlando, FL

www.sigmapisigma.org/congress/2012

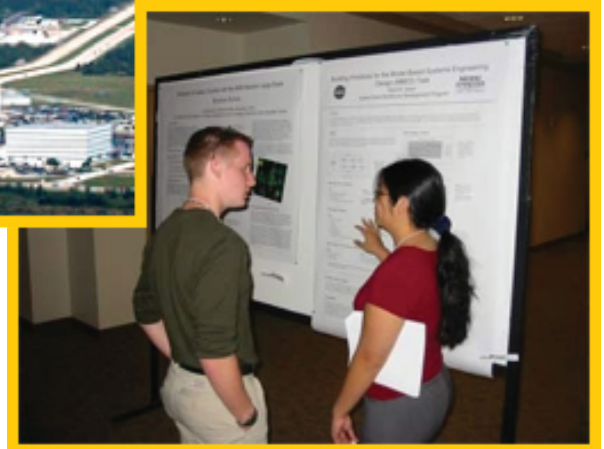

Tour Kennedy Space Center

Hear talks on Astrophysics,
Space flight, Exoplanets and more

Present Student Research

Who comes to the $\Sigma\Pi\Sigma$ Congress?
Undergraduates
Graduate Students
Members of $\Sigma\Pi\Sigma$
Physics Faculty
Physics Alumni

Now, more than ever, physics students realize how connected we are: through climate change, through Facebook, through the International Space Station. Science is becoming more collaborative, more interdisciplinary. Scientists are working with policy makers, community leaders, and the general public. Every day we make new connections to take advantage of our information-driven society.

The Congress is an opportunity for students & scientists to come together, share their research and address the necessity, practicality, and ideals of making connections - whether they are between student and professor, scientist and society, or Earth and an Exoplanet.
