

Exercise - Tool #1: Common Job Titles

⇒ Read through the list of common job titles and jot down any that sound interesting to you. To learn more and to see other options, visit some sites that feature profiles of physicists working in other areas.

Job titles I am interested in...

Top four job titles I am interested in...

⇒ For each job title you are interested in, spend some time exploring what someone with that title does through online searches and write down key words that describe that job below.

Job title:	Job title:	Job title:	Job title:
Key words:	Key words:	Key words:	Key words:

⇒ In the box below, record the job titles that you are interested in learning even more about.

Job titles I need to learn more about

⇒ If desired, repeat this exercise for additional job titles.
