

Post your REU or internship absolutely **free** for 60-days on SPS Jobs.

Faculty can post open positions to reach a community of 65,000 Society of Physics Students (SPS) and Sigma Pi Sigma ($\Sigma\Pi\Sigma$) student members nationally and internationally. Target over 4,000 current undergraduate SPS members by including your job in *SPS News*, our bi-weekly e-mail newsletter.

Organizations that have discovered SPS Jobs include:

- | | |
|---------------------------------------|--------------------------------------|
| Agilent Technologies | National Radio Astronomy Observatory |
| Dauphin Island Sea Lab | Ohio State University |
| EPIR Technologies, Inc. | ORAU/ORISE |
| Fairmont Private School | Seekr Engineering |
| Fermi National Accelerator Laboratory | University of Oregon |
| IBM | University of Washington |
| Louisiana State University | Veeco Instruments, Inc. |

"SPS Jobs is a valuable resource not only for us to advertise our positions, but also valuable for our own undergraduates who are looking for research opportunities elsewhere."

— **Kathy Kash**
Case Western Reserve University

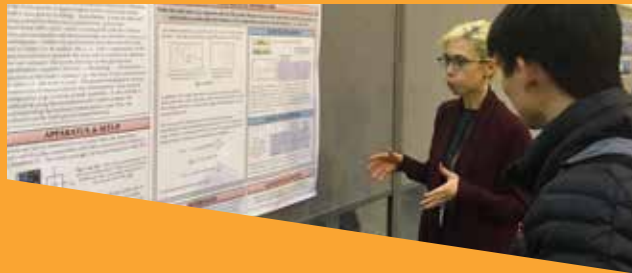

"Posting with SPS has been awesome – I'm so glad I found the site!"

— **Steven Amundson**
IAEA Careers at Argonne National Laboratory

JOIN THE SOCIETY OF PHYSICS STUDENTS AND SIGMA PI SIGMA AUDIENCE OF

65,000

accomplished members when searching for a summer research or bachelor-level career position in physics, chemistry, astronomy, computer science, engineering, mathematics, geology, and other science-related fields worldwide.

ABOUT SPS JOBS:

SPS Jobs is the online job portal of the Society of Physics Students (SPS) and Sigma Pi Sigma ($\Sigma\Pi\Sigma$). **SPS is a professional association explicitly designed for students, with SPS Jobs serving the needs of student and early-career job seekers in the physical sciences and engineering fields.** SPS membership, through collegiate chapters, is open to anyone interested in physics. SPS Jobs is the preeminent source for undergraduate physics and astronomy students searching for REUs, internships, and bachelor-level positions. Hiring employers listing jobs include colleges, universities, national laboratories, non-profits, and industry.

Securing an internship or REU through SPS Jobs is a critical first step in landing the perfect job or finding the right graduate program. SPS Jobs provides a great resource to physics undergraduates looking for professional opportunities.

Through SPS Jobs, members can:

- Easily search for summer research opportunities, internships, co-ops, and bachelor-level job postings
- Create personalized profiles that allow you to customize your job search
- Increase your exposure when your resume is made searchable to potential employers
- Access the **free** career resource library, including recorded webinars on topics such as interviewing and networking
- Explore the Careers Toolbox for Undergraduate Physics Students, featuring resume/CV resources, employment data and statistics, and so much more: spsnational.org/careerstoolbox

"I applied to several openings on SPS Jobs, and received an interview and offer from my current employer. I'm a big fan of SPS Jobs!"

— Teresa Symons
